Subject: Application for International Mobility in the second year at Lodz University of Technology

Dear Sir or Madam,

Passionate about computer science and currently a first-year student at CY-TECH, I am eager to apply to your institution for a semester abroad during my second year of studies. Having had the opportunity to experience Polish culture during my childhood, I am particularly drawn to the chance of engaging in such a dynamic university environment as yours while deepening my expertise in my field.

During my studies at CY-TECH, I have developed a strong affinity for teamwork, project management, and problem-solving through technical challenges. My adaptability to various environments and my organized, methodical approach have allowed me to succeed in collaborative projects and further cultivate my team spirit. I am also highly sociable and greatly enjoy interacting with individuals from different cultural backgrounds, which I believe will facilitate my integration into the academic and social life at your university.

While continuing to follow the standard program at CY-TECH, this mobility represents a unique opportunity for personal and professional growth. It will allow me to explore a new culture and strengthen my knowledge in computer science. I am confident that the experience in Poland will help me overcome some of my weaknesses, such as managing stress, by placing me in new and stimulating situations.

Thank you very much for considering my application. I remain available for any additional information you might require. Looking forward to your positive response, I extend my sincere regards.

Yours faithfully,

Jérémy Perbost
